3. BACKGROUND

- 3.1 The Council has prepared PPF reports for nine years since the PPF was first introduced with the latest one covering 2020/21 submitted in July 2021. The main purpose of the PPF is to provide Ministers, Councils and the public with a better understanding of how a planning authority is performing and delivering high quality development on the ground.
- 3.2 In 2018/19 the Council received fifteen green awards for the first time and this was followed in 2019/20 with another full set of green awards.
- 3.3 The PPF submitted for 2020/21 is attached at **Appendix 1** and follows the updated template issued by the SG with a greater emphasis on the use of case studies to illustrate how key performance markers are met in Moray.
- 3.4 As part of the SG's feedback a summary of performance is included covering the last nine years since marking for the PPF was introduced (tables below). This shows how year on year the number of key markers have been changed to green as well as avoiding slipping back into red.

4. FEEDBACK FROM SCOTTISH GOVERNMENT – PPF 2020/21

- 4.1 Written feedback was received on 29 November 2021 from the Minister for Public Finance, Planning and Community Wealth to the Council's Chief Executive, enclosing a Planning Performance Feedback report on the fifteen 'Performance Markers'.
- 4.2 The letters states "This year has continued to present challenges for people working within planning, in the development sector and across Scotland's communities. We know people are doing the best they can to engage and operate, sometimes in ways and circumstances that may not be ideal, and

with many still predominantly working from home. I appreciate that many of you will have had to make difficult choices in what work is prioritised, in much the same way the Government and Planning and Architecture Division has had to. However, we should all be very proud of how planning has responded to the coronavirus pandemic, adjusting as necessary to keep going and supporting recovery. I want to take this opportunity to thank you and your staff for all work that has been done during the pandemic and to support our ongoing recovery".

- 4.3 The letter then turns to the 2020-21 PPF reporting year, and states "that performance has remained relatively stable. This is a testament to the hard work and flexibility or authorities during these very difficult times and I believe that overall good progress continues to be made by Scotland's planning authorities".
- 4.4 The Performance Markers Report 2020/21 sets out the fifteen performance markers, each one receiving either a red, amber of green RAG rating. Thirteen markers have been given a green rating and two are not applicable. This is the third year in a row that all markers that have been given a green award.
- 4.5 One of the key markers relates to decision-making refers to continuous reduction of average timescales for all development categories and this marker has been awarded a green status. Householder application determination rates have increased slightly to an average of 8.1 weeks from 6.7 weeks; Local applications (non-householders) have also increased slightly to 7.1 weeks. Major planning application average timescales was recorded at 21.3 weeks. Major applications are important to the Moray economy and the majority are covered by processing agreements which assist in determining them timeously and continue to be the number one priority along with fast tracking development proposals in town centres. All three development types for decision-making timescales are below the Scottish average.
- 4.6 One of the other key markers worthy of highlighting relates to the Development plan scheme, which identifies that the LDP 2020 was, adopted within the 5 years of the current plan adoption and within the required the timescale of the scheme. Having an up to date Local Development Plan is essential to Moray's economy. Work has commenced on identifying what information will be required for the evidence report.
