

REPORT TO: PLANNING AND REGULATORY SERVICES COMMITTEE ON 16 AUGUST 2022

SUBJECT: 22/01057/PAN – ERECTION OF CLASS 5 PURPOSES WITH ANCILLARY CLASS 4 THE INSTALLATION OF BIO-REFINERY PLANT, FORMATION OF CAR PARKING AND ASSOCIATED INFRASTRUCTURE AT NORTH STREET, ROTHES, ABERLOUR, MORAY

BY: DEPUTE CHIEF EXECUTIVE (ECONOMY, ENVIRONMENT AND FINANCE)

1. REASON FOR REPORT

- 1.1 To inform the Committee that a Proposal of Application Notice (PAN) was submitted on 15 July 2022 on behalf of Celtic Renewables.
- 1.2 This report is submitted to Committee in terms of Section III (E) (1) of the Council's Scheme of Administration relating to exercising the statutory functions of the Council as a Planning Authority.

2. RECOMMENDATION

2.1 It is recommended that:

- (i) in noting the terms of this report, the Committee advise upon any provisional views/relevant issues that Members of this Committee (or any other Member(s) of the Council) wish to raise about the proposed development so that these matters can be recorded and thereafter fed back to the prospective applicant in order to inform the development of their proposed formal application for planning permission; and
- (ii) the matters raised by the Committee also be forwarded to consultees likely to be involved in any formal application for planning permission for the proposal.

3. BACKGROUND

- 3.1 Scottish Government has published guidance which encourages elected members to highlight any issues with a proposed development at the pre-

application stage which they would wish to see taken into account within any formal application for planning permission.

- 3.2 Following consideration by this Committee on 11 November 2014 it was agreed that any PAN received after this date would be reported to Committee to give Members of the Committee, and the Council, the opportunity to identify any key issues/provisional views about the proposed development and that these matters be reported back to applicant (paragraph 4 of the Minute refers).
- 3.3 This current report is not about the merits of the proposed development but rather, based on local knowledge of local issues and wider concerns, etc. Members are invited to identify any matters relevant to the proposal. These will be reported back to the prospective applicant for their information and attention, and to inform the development of the proposed application. It is also proposed that, for information, Members' comments be forwarded to consultees likely to be involved in any formal application for planning permission for the proposal.
- 3.4 This PAN relates to various activities at the site of the former maltings at the northern end of Rothes, now part of the CoRDE site (biomass fired heat and power plant). The proposal will cover general industrial and business activities (planning Use Classes 4 and 5) based around a bio-refinery and associated development linked with the existing neighbouring CoRDe combined heat and power plant. It is intended that the proposed bio-refinery will utilise local by-products from the whisky industry such as pot ale and draff. A plan is appended showing the location and extent of the site (**Appendix 1**). The site extends to approximately 0.5 hectares and sits within the Rothes settlement boundary and within industrial designation I2 'The Distilleries'.
- 3.5 A formal response will be issued to the applicant's agent to confirm that the proposed arrangements for engaging with the local community are sufficient. The applicant proposes a virtual consultation period and a consultation event for the local community held in Grant Hall in Rothes in September. Speyside Community Council and Local Ward Members will be invited to the events.
- 3.6 For validation purposes for a major application, the applicant is required to submit a pre-application consultation report setting out the steps taken to consult with the local community together with details of comments made on the proposal and how the applicant has responded to all comments made on the proposal in the development of the application.

4. SUMMARY OF IMPLICATIONS

(a) Corporate Plan and 10 Year Plan (Local Outcomes Improvement Plan (LOIP))

Identifying key issues at an early stage to assist with front loading major planning applications is a vital aspect of supporting and facilitating the Council's priority for economic development in Moray.

(b) Policy and Legal

Scottish Government guidance on the role of councillors in pre-application procedures affords elected members the opportunity to offer general provisional views on forthcoming developments which are the subject of a PAN where the details of the development have yet to be finalised.

(c) Financial implications

None.

(d) Risk Implications

None.

(e) Staffing Implications

None.

(f) Property

None.

(g) Equalities/Socio Economic Impact

None.

(h) Climate Change and Biodiversity Impacts

None.

(i) Consultations

Depute Chief Executive (Economy, Environment and Finance), the Head of Economic Growth and Development, the Legal Services Manager, the Development Management and Building Standards Manager, the Equal Opportunities Officer, the Strategic Planning & Delivery Manager, and Lissa Rowan (Committee Services Officer) have been consulted, and comments received have been incorporated into the report.

Members of Moray Council who are not on this Committee have also been consulted and any views received on the proposal will be made known at the meeting

5. CONCLUSION

- 5.1 The Council has received a PAN intimating that a formal application for planning permission will be submitted for a major development proposal, in this case for permission for the development of a bio-refinery, car parking and associated development within the Business and Industry Classes (Class 4 and 5) of the planning Use Class Order. The Committee (and any other Member(s) of the Council) are asked to identify any provisional views/relevant issues which they would wish to see taken into account and inform the development of the proposal.**
